International application No.

PCT/GB2005/000699

Re Item IV

The subject-matter of independent claims 1, 20 and dependent claims 2-12 is already known (see Item V). The requisite unity of invention (Rule 13.1 PCT) therefore no longer exists inasmuch as a technical relationship involving one or more of the same or corresponding special (new and inventive) technical features in the sense of Rule 13.2 PCT does not exist between the subject-matter of the following groups of dependent claims:

- I: Claims 1-13, 20 directed to a valve assembly, dispensing apparatus comprising spacer means in the form of a rotatably mounted collar (figs. 1-7)
- II: Claims 14-19 directed to a valve assembly, dispensing apparatus comprising spacer means which limit the lateral movement (figs. 8-10)
- III: Claims 21-30 directed to a valve assembly, dispensing apparatus comprising spacer means provided on a lever that actuates the valve (figs. 11-18)

Re Item V

1.) subject-matter I:

- 1.1) The present application does not meet the criteria of Article 33(1) PCT, because **the subject-matter of claims 1-12, 20 is not new** in the sense of Article 33(2) PCT.
[see **US-A-5 971 230** figs. 14-19, 24, 26 and column 11, line 43 to column 14, line 60, in particular valve (5), lever (46) integral with nozzle (41) and mounted to a rotated round hinge (44), variable spacer means (30), valve stem (7), spacer portions (37, 38, 39)]

- 1.2) Prior art does not disclose nor suggest a valve assembly according to claim 13 comprising a collar in the form of a clip having a radial slot.

2.) subject-matter II:

- 2.1) The present application does not meet the criteria of Article 33(1) PCT, because **the subject-matter of claims 1-6, 14-17, 20 is not new** in the sense of Article 33(2) PCT.
[see **US-A-3 884 399** figs. 1, 4, 8 in particular nozzle (t, ta) serving as a lever, spacer means (1-4), collar (a)]

- 2.2) The **dependent claims 18, 19** do not contain any additional features which, in combination with the features of any claim to which they refer, involve an inventive step since they come within the scope of the customary practice followed by persons skilled in the art [see **US-A-5 971 230** in particular collar (30) with equivalent recessed portions (figs. 20, 21) or a cam surfaces (figs. 16-19].

Consequently, the **subject-matter of claims 18, 19** lacks an inventive step (Rule 65(1)(2) PCT).

Re Item VIII

- 1.) The independent claims are not in the **two-part form** in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art [document **US-A-5 971 230** (subject-matter I); **US-A-3 884 399** (subject-matter II)] being placed in the preamble (Rule 6.3(b)(I) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).
- 2.) The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
- 3.) Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the **documents US-A-5 971 230** (subject-matter I) and **US-A-3 884 399** (subject-matter II) is not mentioned in the description, nor is this document identified therein.
